Employment History

Software Engineer 2, Dell Technologies, Bengaluru

APRIL 2022-PRESENT

Customer Search and Create | Dell Sales Application

- Used critical thinking to break down problems, evaluate solutions and make decisions as we created Customer Search.
- Helped mitigate security risks by adopting security principles in Gateway which is used across DSA.
- Adopted TDD to increase quality of Code Base.
- Helped my team implement best practices of Micro Services like dynamic logging, service discovery, poly etc. Took KT sessions for my team to use DynaTrace, fiddler/postman and Splunk for quick defect triage.

Software Engineer 1, Dell Technologies, Bengaluru

JULY 2020-MARCH 2022

Customer Search and Create | Dell Sales Application

- We created and are maintaining Ocelot Gateways used across DSA as single point of entry to 50+ services.
- Helped my team in building services for new Customer Search solution and worked with Customer Data team to fulfill Stakeholder Requirements.

Jarvis | Dell Sales Application

- Actively participated in Post Deployment and Production issue by providing workaround and extended help to unblock the business.
- Helped bringing down the total defect count for the project by triaging defects across all teams.

Feature Team - 2 | Dell Sales Application

- Worked on defects to learn more about DSA Web Application.
- Learned leveraging tools like Postman, Http Debugger, GIT Lab, PCF, etc. for developing and triaging.
